THE INSTITUTE OF MANAGEMENT SCIENCES

Officers and Council for 1965

Council Chairman
DAVID B. HERTZ
McKinsey & Co., Inc.
270 Park Avenue
New York, N. Y. 10017

President
ROBERT DORFMAN
Harvard University
Cambridge, Mass. 02138

President-Elect
GEORGE B. DANTZIG
Operations Research Center
University of California
Berkeley, Cal. 94720

Vice President
ERNEST KOENIGSBERG
Matson Research Corp.
215 Market Street
San Francisco, Cal. 94105

Vice President
ROY RADNER
Dept. of Economics
University of California
Berkeley, Cal. 94720

Vice President
PETER V. NORDEN
IBM Data Processing Div.
112 E. Post Road
White Plains, N. Y. 10601

Vice President
RUSSELL L. ACKOFF
Management Science Center
University of Pennsylvania
Philadelphia, Pa. 19104

Vice Chairman
RICHARD L. VAN HORN
The RAND Corporation
1700 Main Street
Santa Monica, Cal. 90406

Secretary-Treasurer
ELIEZER NADDOR
School of Engr. Science
The Johns Hopkins University
Baltimore, Maryland 21218

Associate Secretary
PAUL A. STRASSMANN
National Dairy Products Corp.
260 Madison Avenue
New York, N. Y. 10016

Council Member
SUSUMU KOBE
Dept. of Economics
Waseda University
Tokyo, Japan

Council Member
JACOB MARSCHAK
Western Management Science Inst.
University of California
Los Angeles, Cal. 90024

Council Member
WILLIAM C. HOOD
Bank of Canada
Ottawa 4, Canada

Council Member
MARTIN J. BECKMANN
Dept. of Economics
Brown University
Providence 12, R. I.

Council Member
MAURICE G. KENDALL
C-E-I-R Ltd.
C-E-I-R House, Newman St.,
London, W.1, England

Executive Director
WILLIAM H. EVANS
947 Old York Road
Abington, Pa. 19001

EDITORIAL COUNCIL

Chairman

PROFESSOR C. WEST CHURCHMAN
School of Business Administration
University of California
Berkeley 4, California

Editor-in-Chief: Series A—Sciences Section

PROFESSOR R. M. THRALL
Department of Mathematics, W.E.
University of Michigan
Ann Arbor, Michigan 48104

Editor-in-Chief: Series B—Managerial Section

PROFESSOR SEBASTIAN B. LITTAUER
320 Seeley W. Mudd Building
Columbia University
New York, New York 10027

Editor-in-Chief: Series C—Bulletin Section

JOSEPH E. HOAGBIN
Institute of Science & Technology
University of Michigan
P. O. Box 618
Ann Arbor, Michigan 48107

Published monthly by The Institute of Management Sciences at Mt. Royal and Guilford Avenues, Baltimore, Maryland 21202.
Subscriptions, memberships and changes of address should be sent to the Institute at 947 Old York Road, Abington, Pennsylvania 19001, U.S.A.
Advertising should be sent to HAROLD H. CAUVET, P. O. Box 273, Pleasantville, New York 10570, U.S.A.
Subscription price $20.00 per year. Back issues $2.00 per copy when available. See inside back cover.
Membership fee $15.00 per year which includes a subscription to MANAGEMENT SCIENCE.
Special reduced membership fees available to students, members of the Armed Forces and residents outside the U.S.A.

Library of Congress Catalog Card No. 56-21107. *Printed by the Waverly Press, Inc.*

Second class postage paid at Baltimore, Md.

INDEX TO VOLUME 11—SERIES A

Authors

AVI-ITZHAK, B., A sequence of service stations with arbitrary input and regular service times, 565.

—— AND YADIN, M., A sequence of two servers with no intermediate queue, 553.

BALAS, E. AND IVANESCU, P., On the generalized transportation problem, 188.

BANERJEE, RANAJIT, Comments on "statistical control of time standards," 602.

BAUMOL, WILLIAM J. and FABIAN, TIBOR, Decomposition, pricing for decentralization and external economies, 1.

BELLMAN, RICHARD, SHULL AND DELBECQ's *Selected readings in management; extensions and modifications (second series)*: Book Review, 609.

BROIDO, A., MCCONNEN, R. J. AND O'REGAN, W. G., Some operations research applications in the conservation of wildland resources, 802.

BROWN, GEORGE W., LU, JOHN Y. AND WOLFSON, ROBERT J., Dynamic modeling of inventories subject to obsolescence, 51.

BUFFA, ELWOOD S., see ARNOLD REISMAN.

BURT, OSCAR R., Optimal resource use over time with an application to ground water, 80.

CHU, KONG AND NAYLOR, THOMAS H., A dynamic model of the firm, 736.

CHURCHMAN, C. WEST, WARD'S *Operational research in local government*: Book Review, 896.

DALKEY, NORMAN C., Solvable nuclear war models, 783.

DEAN, BURTON V., Allocation of research and development resources in U.S. and Israel industry, 94.

DYCKMAN, T. R., Allocating funds to investment projects when returns are subject to uncertainty: a comment: Communications to the Editor, 348.

DZIELINSKI, BERNARD P. AND GOMORY, RALPH E., Optimal programming of lot sizes, inventory and labor allocations, 874.

EASTMAN, WILLARD L., Comments on a paper by Schild and Fredman: Communications to the Editor, 754.

——, EVEN, S. AND ISAACS, I. M., Bounds for the optimal scheduling of n jobs on m processors, 268.

EISENMANN, KURT, The generalized stepping stone method for the machine loading model, 154.

EVEN, S., see W. L. EASTMAN.

FABIAN, TIBOR, see WILLIAM J. BAUMOL.

FAMA, EUGENE F., Portfolio analysis in a stable paretian market, 404.

FIFE, DENNIS W., Scheduling with random arrivals and linear loss functions, 429.

FISHBURN, PETER C., Independence, tradeoffs, and transformations in bivariat utility functions, 792.

FLOOD, MERRILL M., WILDE's *Optimum seeking methods:* Book Review, 352.

FRANK, CHARLES R., JR., A note on the assortment problem, 724.

FROMOVITZ, STAN, Non-linear programming with randomization, 831.

GAPP, WILLIAM, MANKEKAR, P. W. AND MITTEN, L. G., Sequencing operations to minimize in-process inventory costs, 476.

GAVER, D. P., JR., Models for appraising investments yielding stochastic returns, 815.

GEISLER, MURRAY A., SANDLER's *System reliability engineering:* Book Review, 757.

GIFFLER, BERNARD, Mathematical solution of parts requirements problems, 847.

GLASSEY, C. ROGER, Critical comments on "technical characteristics of distribution simulators" by Gerson and Maffei: Communications to the Editor, 488.

GOLD, BELA, Economic effects of technological innovations, 105.

GOMORY, RALPH E., see BERNARD P. DZIELINSKI.

GOTTERER, MALCOLM H., MCGUIRE's *Theories of business behavior*: Book Review, 351.

GRENIEWSKI, HENRYK, Intention and performance: a primer of cybernetics of planning, 763.

GUTJAHR, ALLAN L. AND NEMHAUSER,

GEORGE L., An algorithm for the line balancing problem, 308.

HARRIS, LAWRENCE, Note on the problem of lump-sum losses in sales training: Communication to the Editor, 891.

HEESTERMAN, A. R. G. AND SANDEE, J., Special simplex algorithm for linked problems, 420.

HERTZ, DAVID B., Mobilizing management science resources, 361.

HILLIER, FREDERICK S., Supplement to "the derivation of probabilistic information for the evaluation of risky investments": Communications to the Editor, 485.

HINOMOTO, HIROHIDE, Capacity expansion with facilities under technological improvement, 581.

HOOS, IDA R., BRIGHT's *Research, development, and technological innovation*: Book Review, 896.

ISAACS, I. M., see W. L. EASTMAN.

IVANESCU, P., see E. BALAS.

ISVARAN, BALKRISHNA, Remarks on "inventory valuations—an analytic technique" by Harlan D. Mills: Communications to the Editor, 487.

JEWELL, WILLIAM S., Risk-taking in critical path analysis, 438.

——, see SHAILENDRA C. PARIKH.

KRASNOW, HOWARD S. AND MERIKALLIO, REINO A., The past, present, and future of general simulation languages, 236.

LANGIER, F. J., Reply to R. Banerjee: Communications to the Editor, 755.

LAWLER, EUGENE L., On scheduling problems with deferral costs, 280.

LEMKE, C. E., Bimatrix equilibrium points and mathematical programming, 681.

LOURIE, JANICE R., Topology and computation of the generalized transportation problem, 177.

LU, JOHN Y., see GEORGE W. BROWN.

LUNDH, BERTIL, see HARVEY M. WAGNER.

MACQUEEN, J., A problem in making resources last, 341.

MANNE, ALAN S., Plant location under economies - of - scale—decentralization and computation, 213.

MANKEKAR, P. W., see WILLIAM GAPP.

MAYHUGH, J. O., On the mathematical theory of schedules, 289.

MCCALL, JOHN J., Maintenance policies for stochastically failing equipment: a survey, 493.

MCCONNEN, R. J., see A. BROIDO.

ZYMELMAN, MANUEL, A stabilization policy for the cotton textile cycle, 572.

Articles

Algorithm for the line balancing problem, An. ALLAN L. GUTJAHR AND GEORGE L. NEMHAUSER, 308.

Allocating funds to investment projects when returns are subject to uncertainty: a comment, by T. R. DYCKMAN, Communications to the Editor, 348.

Allocation of research and development resources in U.S. and Israel industry, by BURTON V. DEAN, 94.

Assembly line balancing using probabilistic combinations of heuristics, by FRED M. TONGE, 727.

Assortment problem, A note on the. CHARLES R. FRANK, JR., 724.

Bimatrix equilibrium points and mathematical programming, by C. E. LEMKE, 681.

Book Reviews:

BRIGHT's *Research, development, and technological innovation*, by IDA R. HOOS, 896.

DRUCKER's *Managing for results*, by LEOPOLD R. MICHEL, 354.

EWING's *Long-range planning for management*, by LEOPOLD R. MICHEL, 210.

FEIGENBAUM and FELDMAN's *Computers and thought*, by ANATOL RAPOPORT, 203.

GEORGE's *Management in industry*, by S. BENJAMIN PRASAD, 757.

KAST and ROSENZWEIG's *Science, technology, and management*, by THOMAS C. ROWAN, 353.

McGUIRE's *Theories of business behavior*, by MALCOLM H. GOTTERER, 351.

SANDLER's *System reliability engineering*, by MURRAY A. GEISLER, 757.

SCHUCHMAN's *Scientific decision making in business; readings in operations research for nonmathematicians*, by RONALD H. SHEPHARD, 604.

SHULL and DELBECQ's *Selected readings in management; extensions and modifications (second series)*, by RICHARD BELLMAN, 609.

WARD's *Operational research in local government*, by C. WEST CHURCHMAN, 896.

WILDE's *Optimum seeking methods*, by MERRILL M. FLOOD, 352.

Books Received, 212, 357, 491, 616, 760, 899.

Bounds for the optimal scheduling of n jobs on m processors, by W. L. EASTMAN, S. EVEN AND I. M. ISAACS, 268.

Capacity expansion with facilities under technological improvement, by HIROHIDE HINOMOTO, 581.

Computing optimal (s, S) inventory policies, by ARTHUR F. VEINOTT, JR. AND HARVEY M. WAGNER, 525.

Critical comments on "technical characteristics of distribution simulators" by Gerson and Maffei, by C. ROGER GLASSEY, Communications to the Editor, 488.

Decomposition of project networks, by

Shailendra C. Parikh and William S. Jewell, 444.

Decomposition, pricing for decentralization and external economies, by William J. Baumol and Tibor Fabian, 1.

Dynamic modeling of inventories subject to obsolescence, by George W. Brown, John Y. Lu and Robert J. Wolfson, 51.

Dynamic model of the firm, A. Kong Chu and Thomas H. Naylor, 736.

Economic effects of technological innovations, by Bela Gold, 105.

Empirical study of exactly and approximately optimal inventory policies, An. Harvey M. Wagner, Michael O'Hagan and Bertil Lundh, 690.

Errata, by Herbert K. Weiss, Communications to the Editor, 895.

General model for production and operations systems, A. Arnold Reisman and Elwood S. Buffa, 64.

Generalized stepping stone method for the machine loading model, The. Kurt Eisemann, 154.

Generalized transportation problem, On the. E. Balas and P. Ivanescu, 188.

Growth considerations of research and development and the national economy, The. Herbert K. Weiss, 368.

Independence, trade-offs, and transformations in bivariate utility functions, by Peter C. Fishburn, 792.

Intention and performance: a primer of cybernetics of planning, by Henryk Greniewski, 763.

Lump-sum losses in sales training, Note on the problem of. Lawrence Harris, Communications to the Editor, 891.

Maintenance policies for stochastically failing equipment: a survey, by John J. McCall, 493.

Making resources last, A problem in. J. MacQueen, 341.

Management behavior by use of competitive business games, A study of. Gifford H. Symonds, 135.

Mathematical analysis of rates of return under certainty, by Daniel Teichroew, Alexander A. Robichek and Michael Montalbano, 395.

Mathematical solution of parts requirements problems, by Bernard Giffler, 847.

Mathematical theory of schedules, On the. J. O. Mayhugh, 289.

Measuring risk on consumer instalment credit, by Paul F. Smith, 327.

Mobilizing management science resources, by David B. Hertz, 361.

Models for appraising investments yielding stochastic returns, by D. P. Gaver, Jr., 815.

Non-linear programming with randomization, by Stan Fromovitz, 831.

Operations research applications in the conservation of wildland resources, Some. A. Broido, R. J. McConnen and W. G. O'Regan, 802.

Operations research in the USSR as education and research work, by Ivan M. Sirovezhin, 593.

Optimal programming of lot sizes, inventory and labor allocations, by Bernard P. Dzielinski and Ralph E. Gomory, 874.

Optimal resource use over time with an application to ground water, by Oscar R. Burt, 80.

PARM—an economic programming model, by Marshall K. Wood, 619.

Past, present, and future of general simulation languages, The. Howard S. Krasnow and Reino A. Merikallio, 236.

Plant location under economies-of-scale—decentralization and computation, by Alan S. Manne, 213.

Portfolio analysis in a stable paretian market, by Eugene F. Fama, 404.

Problem of dependability of a complex system having two types of components, The. R. K. Wasan, Communications to the Editor, 751.

Reply to R. Banerjee, by F. J. Langier, Communications to the Editor, 755.

Remarks on "inventory valuations—an analytic technique" by Harlan D. Mills, by Balkrishna Isvaran, Communications to the Editor, 487.

Risk-taking in critical path analysis, by William S. Jewell, 438.

Scheduling problems with deferral costs, On. Eugene L. Lawler, 280.

Scheduling with deadlines and loss functions on *k* parallel machines, by James G. Root, 460.

Scheduling with random arrivals and linear

loss functions, by DENNIS W. FIFE, 429.

Schild and Fredman, Comments on a paper by. WILLARD L. EASTMAN, Communications to the Editor, 754.

Sequence of service stations with arbitrary input and regular service times, A. B. AVI-ITZHAK, 565.

Sequence of two servers with no intermediate queue, A. B. AVI-ITZHAK AND M. YADIN, 553.

Sequencing operations to minimize in-process inventory costs, by WILLIAM GAPP, P. S. MANKEKAR AND L. G. MITTEN, 476.

Simple and combined inventory policies, production to stock or to order?, by W. POPP, 868.

Solvable nuclear war models, by NORMAN C. DALKEY, 783.

Special simplex algorithm for linked problems, by A. R. G. HEESTERMAN AND J. SANDEE, 420.

Stabilization policy for the cotton textile cycle, A. MANUEL ZYMELMAN, 572.

"Statistical control of time standards," Comments on. RANAJIT BANERJEE, Communications to the Editor, 602.

Stochastic inventory models for rental situations, Some. M. TAINITER, 316.

Supplement to "the derivation of probabilistic information for the evaluation of risky investments," by FREDERICK S. HILLIER, Communications to the Editor, 485.

Topology and computation of the generalized transportation problem, by JANICE R. LOURIE, 177.

Transportation problem with stochastic demand, The. WLODZIMIERZ SZWARC, 33.

MANAGEMENT SCIENCE

JOURNAL OF THE INSTITUTE OF MANAGEMENT SCIENCES

●

PUBLISHED QUARTERLY SINCE OCTOBER 1954
IT BECAME A BIMONTHLY WITH THE
FIRST ISSUE OF VOLUME 11
IN SEPTEMBER 1964

Editor-in-Chief: Professor R. M. Thrall, University of Michigan

●

A NEW MANAGERIAL SECTION, incorporating MANAGEMENT TECHNOLOGY and the TIMS BULLETIN, HAS BEEN PUBLISHED EVERY OTHER MONTH STARTING IN FEBRUARY 1965 ALTERNATELY WITH THE SCIENCES SECTION.

Editor-in-Chief, Managerial Section: Professor S. B. Littauer
Columbia University

Editor-in-Chief, Bulletin Section: Joseph E. Hoagbin, University of Michigan

Chairman of the Editorial Council: Professor C. West Churchman, University of California, Berkeley

●

AND THUS IT HAS BECOME A MONTHLY JOURNAL.

Subscription price is $20.00 for one year,
$38.00 for two years, $54.00 for three years.

For membership and subscription information write to

Articles

Adaptation in the production process. FERDINAND K. LEVY, B-136.

Advertising expenditures in coupled markets—a game-theory approach. MELVIN F. SHAKUN, B-42.

Applying operations research and the management sciences to the problems of government. ELMER B. STAATS, C-6.

Automated information systems in planning, control and command. ANDREW VAZSONYI, B-2.

Brand switching and mathematical pro-

gramming in market expansion. PHILIP H. HARTUNG AND JAMES L. FISHER, B-231.

Contract research proposal preparation strategies. BURTON V. DEAN AND ROBERT H. CULHAN, B-187.

Econometrics and management science: their overlap and interaction. H. THIEL, B-200.

Electronics in management. DAVID B. HERTZ, B-59.

Forest management and operational research: a linear programming study. P. A. WARDLE, B-260.

Free for all, B-154, B-213, B-282.

General purpose forecast simulator, A. DONALD GROSS AND JACK L. RAY, B-119.

Improvement in implementation of O.R., On the need for. D. G. MALCOLM, B-48.

Inter-organizational relations, Toward a theory of. WILLIAM M. EVAN, B-217.

Letter to the editor—free for all. EDWARD D. GOLDBERG, B-214.

Operations research in education. WILLIAM G. SHEPHERD, C-13.

Potential for office automation in department stores, The. T. T. KWO, B-271.

Production process: operating characteristics, The. ADAM ABRUZZI, B-98.

Quantitative approach to employment planning, A. GEORGE L. NEMHAUSER AND HENRY L. W. NUTTLE, B-155.

Researcher and the manager: a dialectic of implementation, The. C. W. CHURCHMAN AND A. H. SCHAINBLATT, B-69.

Roadblocks to progress in the management sciences and operations research. LOUIS T. RADER, C-1.

Scientific method, On the. Free for all. W. C. WEDLEY, B-284.

Searching new horizons for management science. Free for all. E. R. ARZAC, H. M. BOGO AND P. J. F. PAVESI, B-283.

Statistical control applications in linear programming. NORBERT LLOYD ENRICK, B-117.

Stochastic decision trees for the analysis of investment decisions. RICHARD F. HESPOS AND PAUL A. STRASSMANN, B-244.

Three heuristic rules for sequencing jobs to a single production facility. J. WILLIAM GAVETT, B-166.

Unity of science and management, The. DAVID B. HERTZ, B-89.
